OBJECTIVE

Full-stack and backend-focused BCA student with hands-on project experience in web development and AI, looking to work on real products where I can contribute from day one. I enjoy building things end-to-end — from designing APIs to deploying working apps — and I'm looking for a team where I can keep growing as a developer.

EDUCATION

Course	Year	Institution	Score	Remarks
BCA	2023-26	Chandigarh University, Gharuan	6.56 CGPA	Pursuing
Class XII (CBSE)	2023	Delhi Public School, Saharanpur	60.2%	Passout
Class X (CBSE)	2021	Delhi Public School, Saharanpur	61.33%	Passout

PROJECTS

Task Management System | github.com/NAMANSAINI62/Task-Management-System

- A backend task management system I built using Flask and MySQL, that supports secure task operations through a proper REST API structure with distinct Admin and User roles.
- Designed and tested a clean REST API with 10+ endpoints, handling task creation, assignment, and status updates, with structured error handling and consistent response formats throughout.

Super AI Transcript | huggingface.co/spaces/namansaini2867/super-ai-transcript

- An AI-powered Flask app that runs OpenAI Whisper locally to transcribe audio with high accuracy, keeping the raw audio processing on-device instead of sending it to external services.
- Layered Gemini AI on top of the transcription output so users can automatically clean up text, get summaries, and ask questions about the content — all within the same interface. Deployed live on HuggingFace Spaces.

SKILLS & TECHNICAL COMPETENCIES

- Languages: Python, JavaScript, HTML5, CSS3, Tailwind CSS, React
- Backend & APIs: Flask, REST API
- Database: MySQL, PostgreSQL
- Tools: Git/GitHub, Postman, Claude AI

CERTIFICATIONS

- Backend Development and API – Coursera (Verified: coursera.org/account/accomplishments/verify/8DGS69CKK91U)

ACADEMIC ACHIEVEMENTS & AWARDS

- Hackathon 2025 – Finalist: Selected as a finalist for the Super AI Transcript project, competing against multiple teams — recognised for building an end-to-end AI pipeline that actually works in production.

OTHER INFORMATION

- Languages Known: English, Hindi
